ABOUT ERVIN

ERVIN

The World Standard for Quality

We are specialists in abrasives. Our history goes back to the invention of the steel abrasive casting process in the early 1920s by our founder John F. Ervin. His descendants still lead our company while his unquenchable desire to do things the best possible way still drives everything we do.

We welcome the opportunity to work with our customers to help them achieve the best possible blasting efficiency in their business.

Our products are designed and carefully monitored to meet international standards and consistently deliver the best possible results in every blasting environment.

Products

- · Steel shot and grit
- · Stainless steel shot and grit

Applications

- Cleaning
- Surface Preparation
- Peening
- Cutting

Ervin Key Benefits

- Lowest consumption
- Reduced wear
- Highest productivity, lowest cost
- Reduced dust and waste disposal
- Consistent abraisive performance
- Local technical support

Manufacturing Locations

- Tipton (UK)
- Sprockhövel & Glaubitz (Germany)
